

**BÜHLMANN Laboratories AG** is an innovative manufacturer of medical diagnostics. The company, headquartered in Schönenbuch/Basel, employs around 90 people and is active on a global scale.

The **in vitro diagnostic** (IVD) kits and reagents which BÜHLMANN develops are sold successfully to hospitals and clinical laboratories around the world.

In our **International Affairs** department, we have created a **new position** and are looking for a self-motivated person (m/f) within our **Marketing Team** as

## **Junior Product Manager (eHealth) 100%**

### **Your Tasks**

- Support the Product Management in daily operation of the IBDoc<sup>®</sup> eHealth platform ([www.ibdoc.net](http://www.ibdoc.net))
- Help coordinate software development with external suppliers and customers
- Serve as specialized IBDoc<sup>®</sup> product support for our Customer Support team
- Create patient and professional user training and support material such as software manuals or training videos
- Create product specific marketing material (online posts, flyers, videos)
- Attend marketing events (scientific congresses) and perform product trainings (20% international travel)

### **Your Profile**

- MSc or PhD in Life Sciences, medical informatics or related fields
- Excellent English oral/written skills (C2 or native)
- Fluent in German oral/written (C1)
- You have experience in general project management
- You have some experience in software project management for web based and native iOS and Android applications
- You share our fascination for complex cutting edge product combinations between biochemistry and software components
- You like to position an innovative product in the fast growing market for digital medicine and eHealth
- Team player who works co-operatively but also independently in a small and flexible team

### **We Offer**

- Exciting and diverse professional activities in a dynamic, independent and growing company
- A thorough introduction phase in preparation for a challenging area of responsibility
- The opportunity to be part of very innovative projects in the fields of medical and eHealth sciences
- Potential for professional and personal development

We look forward to receiving your complete application documents, including a picture. Please send it by Email to [ks@buhlmannlabs.ch](mailto:ks@buhlmannlabs.ch) Applications will be treated with confidentiality. **No agencies please.**

*Data protection: your application documents will only be used during the application process. Once the open position has been filled, your application documents will be deleted.*
