

# CALEX<sup>®</sup> Cap Collection Set

## Fecal Sampling Kit

Minimize  
Preamalytics

Maximize  
Workflow

Calprotectin and p-Elastase in one patient prepared tube

### Lab Safety:

- Outsourcing stool handling to patient
- Sampled fecal material enters lab. Improved protection from infectious agents

### Efficiency and Speed:

- Ready to use fecal extracts with BÜHLMANN assays
- Optimization of fecal testing workflow, reduced work load

### Reliability:

- CALEX<sup>®</sup> correlates to gold standard manual extraction
- CALEX<sup>®</sup> has very high patient usability scores

## Unique Features

The CALEX® Cap device can be given to an instructed patient for self-sampling at his home.

The easy and intuitive use showed a high patient usability score.

The high stability of the analytes in the buffer allows easy transportation to the laboratory.

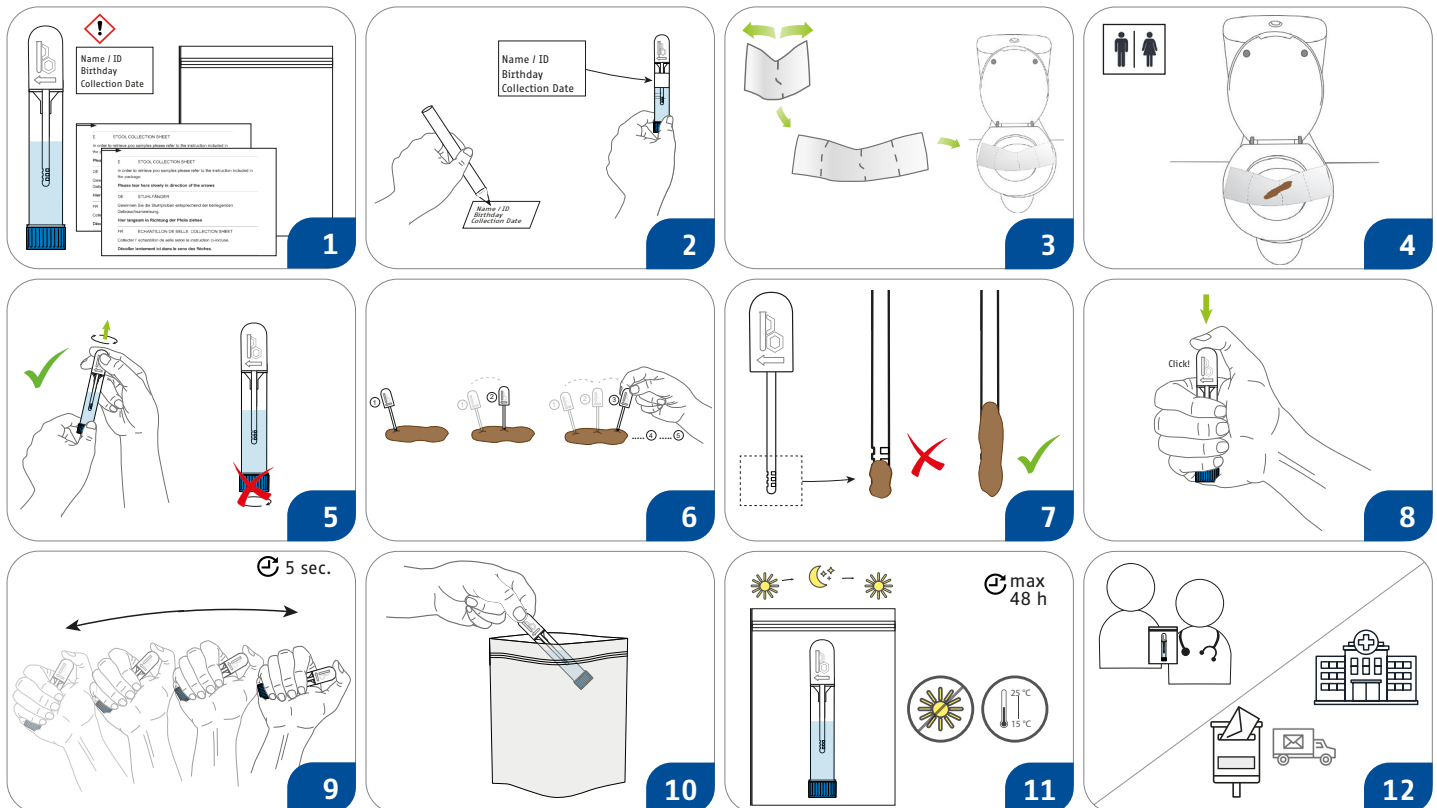

The high quality of the CALEX® Cap allows a safe transportation to the laboratory even by air mail.

The collecting centre may organize the transportation depending on their specific need.

During transportation the collected sample will be completely dissolved.

The sample arrives in the lab in a closed system and can be brought immediately for analysis after a short centrifugation step.

Besides sample registration, no additional manual pre-analytical steps by lab personal needed.

For correct stool sampling please refer to the corresponding instruction for use.
