

BÜHLMANN Laboratories AG is an internationally operating Life Science company that supports clinical laboratories with innovative diagnostic products and first-class services, empowering healthcare providers to deliver more accurate diagnostics for patients worldwide.

We are a medium-sized enterprise located in Schönenbuch, BL, employing approximately 120 people across departments that cover the entire IVD value chain under ISO 13485 certification. Our self-developed in vitro diagnostic products (IVD) are used globally by hospitals and diagnostic laboratories.

The **Development** department is looking for a lab technician as of [start date] (or according to availability) for the following position:

## **Lab Technician Product Validation (100%)**

### **Your Responsibilities**

- Support development projects at transfer or validation level by executing laboratory work
- Perform immunological tests using various platforms (e.g., Flow Cytometry, ELISA, PETIA, etc.)
- Conduct studies to establish and optimize kit reagents and protocols
- Carry out and assess routine stability tests and performance characteristics
- Handle biological materials (stool, blood, urine, etc.) and perform sample preparation
- Independent documentation of experimental results in compliance with GMP standards
- Instrument responsibility including calibration and maintenance tasks to maintain a GMP environment
- Maintenance of databases and material stocks for the development unit
- Laboratory training of new employees and, where applicable, customers and distributors

### **Your Profile**

- Completed apprenticeship as lab technician (biology, chemistry, biomedical analytics, or similar)
- Initial practical experience in the field of in vitro diagnostics (IVD) and immunoassays
- General IT skills in a Windows and MS Office environment; basic experience with data evaluation software
- Languages: Proficient in spoken and written English; basic German knowledge
- Precise, reliable, and independent working style with strong attention to detail
- Analytical, systematic, and methodical approach; strong adherence to protocols and documentation requirements
- Quick learner, resilient, and flexible; comfortable working in small teams

### **What We Offer**

- A versatile and challenging position in a dynamic, innovative company
- Comprehensive introduction and training in your field of work
- Collaboration with an experienced, interdisciplinary team
- Direct contribution to improving patient diagnostics worldwide
- A stable, medium-sized company with an international reach

If this position appeals to you, we look forward to receiving your complete application documents via email to [career@buhlmannlabs.ch](mailto:career@buhlmannlabs.ch)
